

# Data Citation Implementation Pilot (DCIP) Executive Committee Meeting, October 16, 2015

Attendees: Tim Clark (chair), Jeffrey Grethe, Carole Goble, Stephanie Hagstrom, Maryann Martone, Jo McEntyre, Joan Starr  
Regrets: Simon Hodson

<Recording started half way through the meeting>

## 1. Goals of the Project

- Pilot project needs to define its scope – we want to induce authors through the leverage of publishers to deposit, robustly archive, and cite their data
- We will help establish benchmark implementation with groups that are financially and organizationally ready
  - Focus on archiving and citing primary research data
- We will also work with Simon Hodson and Christine Borgman who are running international workshops on data citation with CODATA
  - Focused on large, stakeholder organizations
  - North American workshop is coming up in March
  - DataCite is also organizing a pilot to extend the Making Data Count work that PLOS and CDL engaged in – will measure data citation impact
- The pilot project will also publish peer-reviewed articles and a final report

## 2. Personal Introductions

## 3. Funding Relationships and Reporting Requirements

## 4. Organization and Operations

- Executive Committee
  - Chairs: Maryann Martone and Tim Clark
  - Members: Carole Goble, Jeffrey Grethe, Jo McEntyre, Joan Starr, Simon Hodson
- We have a first draft of agreed group participants ([invitation list](#))
  - Tim spoke to the CEO of [IOS Press](#) in Amsterdam who agreed to participate
  - We have a participation gap in special purpose repositories
    - PDB is participating but we need a couple more for this use case
    - It would be good to have requirements or expectations for participation agreement
      - What we want from the repositories is outlined in data citation paper (<https://peerj.com/articles/cs-1/>)
        - We want the special purpose repositories on the path to implementing our guidelines (e.g., identifier resolves to a landing page)

- We need to carefully choose which repositories to pursue and explain why they should respond to our recommendations
        - We could include degrees of engagement (i.e., bronze, gold, etc. levels)
      - We also want to understand what difficulties/road blocks the repositories have with implementation
    - We should invite Henning Hermjakob as a group member
      - Some participants (including Henning) and use cases proposed at the Heathrow Workshop are critical to incorporate on this pilot
        - Jo offered to recruit members from [PDBe](#) as well
      - DCIP invitation list:
        - <https://docs.google.com/spreadsheets/d/1npcxfRXMOEHJ1RO5KB14GOvNmyiDApMK-pP7irDSmKM/edit?usp=sharing>
    - We included funding for workshops based on our RRID project to involve feedback from repositories, publishers, and authors
5. Next Steps
  - We should schedule another call to discuss actions, possibly schedule weekly meetings
    - **Action:** schedule recurring meetings on Wednesdays at 8:00 am Pacific Time
  - **Action:** Stephanie will share the DCIP budget with the Exec. Committee
    - Overall goal of the original proposal was to conduct a pilot project involving actual work with journals who were willing to implement a system of data citation
      - Project proposal and budget are located in DCIP's Google Drive Administration folder: <https://drive.google.com/folderview?id=0B-3fjDfTO3dDaeFU2bUsydGJWVmc&usp=sharing&tid=0B-3fjDfTO3dDaQnU2RWZIUkFQZ1U#grid>
