

FORCE11 - DCIP Group Leaders Meeting
May 18, 2016 08:00 AM Pacific Time

In Attendance: Joan, Amye, Tim, Helena, Stephanie, Chun-Nan, Carole

AGENDA

1. Status of Work & Discussion

- a. Identifiers - upcoming workshop June 2 at Harvard
 - i. Identifiers has had pre-meetings of the CDL & EBI groups. Goal is to align both on Identifiers.org repo and standardize for data citations. The Harvard workshop will be combination discussion, hackathon and outreach planning.
 1. This activity started due to a lack of clarity in ways to achieve a resolvable identifier.
 2. Workshop attendees will work on harmonizing resolving systems so that someone can use either the European resolver system or the American and achieve the same results.
 - ii. Discussion - Tim & Group
 1. The workshop will also ask if we want to extend the identifiers.org project with a metadata component.
- b. Early Adopter Repositories - upcoming workshop June 22 at UCSD
 - i. Precedes bioCADDIE Repositories Outreach meeting. Will develop proposed landing page metadata and outreach plan for repos. So can get all the metadata you need to create a citation. 15 people coming.
 1. This metadata will be recommended to repositories via an outreach program afterwards.
 - ii. Discussion - Martin, Merce & Group
- c. Early Adopter Publishers - upcoming workshop July 22 in London
 - i. Uptake is a bit light but we have Elsevier, Springer Nature, eLife and PLoS involved so far. Workshop will (continue to) develop a Publishers Roadmap recommendation document for data citation.
 - ii. Discussion: Amye, Helena & Group
 1. EG3 had their first call last week and went through the different problems encountered by various publishers.
 - a. They'll try to identify the main problems before the workshop so that they can work on a more detailed roadmap during it.
 2. Is there a group working on references to input data or packaging up and creating a master citation?
 - a. Jo McEntyre is attending the workshop and could offer recommendations for this.
